CARBON MARKETS

- Carbon credit development and selection of potential markets
- Design to implementation, generation of credits
- Additionality assessment, quality in accordance to Core Carbon Principles - ICVCM
- Assurance services
- Risk assessment and response plan to ESG risks and opportunities

RECOGNITION OF IFRS ISSB AS THE SINGULAR GLOBAL ESG REPORTING STANDARD

"Investors are demanding better information about sustainability risks and opportunities, and the G20, the G7, and the FSB rely on IOSCO to assess whether the ISSB Standards are fit for purpose for capital markets. Our members, working together, have carefully analysed the ISSB's standards against IOSCO's endorsement criteria.

IOSCO has found that the ISSB conducted a robust process and have concluded that these standards serve as an effective and proportionate global framework of investor-focused disclosures on sustainability- and climate-related risks and opportunities."

Jean-Paul Servais, Chair, International Organization of Securities Commission (IOSCO), July 2023

RECOGNITION OF IFRS ISSB AS THE SINGULAR GLOBAL ESG REPORTING STANDARD

June 2023 - IFRS1 released its ESG disclosure standards:

- ◆ Premised on (now ISSB3) global ESG standards for investor-centric, industry-specific information
- ◆ Proven decision-useful metrics that drive long-term value creation, financial performance of companies
- ◆ Paves way for adoption of a global ESG Greenwashing avoidance tool

The IFRS roadmap requires investment markets (public and private) to adopt the ISSB standard driving investment decisions through clear appraisal of sustainability risks and opportunities

July 2023 - IOSCO publicly endorses the use of ISSB standards as fit for purpose for capital markets

1. International Financial Reporting Standard
2. Sustainability Accounting Standards Board
3. International Sustainability Standards Board

DOTPROJECTS

ESG REPORTING – ISSB

10/20

- SASB – Sustainability Accounting Standards Board :
For investment community / capital providers to drive ESG reporting with decision useful information
- Industry specific metrics 'material' to financial performance and the ability to generate long term value
- June 2023 : Launch of IFRS sustainability standards incorporating SASB standards
- July 2023 : Singapore regulators consult public on mandatory sustainability reporting using IFRS standards
- Task Force on Climate-related Financial Disclosures (TCFD) – Recommendations for companies to assess, implement and report climate-related risks and opportunities
- Climate Scenario Analysis and Mitigation Plan
- 4 key areas :- Governance, Strategy, Risk Management, Metrics & Targets

CASE STUDY : ESG MATERIALITY ANALYSIS AND CLIMATE CONSULTANCIES ALIGNING A PE-BACKED PORT-CO IN ITS ESG AMBITIONS

Presented by:
DotProjects

2025/01

2022

- ◆ Platform provider for 2nd-hand trade of mobile devices, based in Finland
- ◆ Privately backed by a global Japanese PE Conglomerate
- ◆ Unique Value Proposition to 'Reduce', 'Re-use' and 'Recycle' not realised due to confusion on ESG and inherent value creation metrics
- ◆ Required ESG consultant to align, re-set and design a roadmap for ESG initiatives that drive the value creation plan

TO BE CONTINUED

- Carried out ISSB ESG Materiality Analysis using industry-specific disclosure areas to identify 'material' topics and KPIs
- Designed a roadmap for data collection, reporting cadence, analysis and reporting to implement the ESG disclosure system
- High-level set-up of Net-Zero strategy and roadmap, Scope 1-3 emissions to achieve carbon neutrality¹
- High-level assessment on the use of carbon markets and carbon credits to support Net-Zero ambitions
